PROFESSIONAL SUMMARY

Full Stack Developer with **2 years of experience** in designing and developing **scalable, responsive web applications** using **React.js, Node.js, JavaScript, TypeScript, MongoDB, and MySQL**. Skilled in building **high-performance user interfaces**, developing **RESTful APIs**, and implementing **secure authentication**. Experienced in **API integration, debugging, code reviews**, and **Agile development**. Understanding of **SDLC** and software design principles, with a focus on building scalable, reusable, and efficient applications.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, SQL, Python (Basics)
Frontend: React.js, Redux Toolkit, HTML5, CSS3, Tailwind CSS, Bootstrap, Material UI
Backend: Node.js, Express.js, RESTful API Development
Databases: MongoDB, MySQL, Pinecone (Vector Database)
Tools & Platforms: Git, GitHub, Docker, Postman, VS Code, Jira, AWS
Concepts: Data Structures & Algorithms (DSA), Software Development Life Cycle (SDLC), Object-Oriented Programming (OOP), Unit Testing, Code Review Practices, CRUD Operations, JWT Authentication, API Integration, State Management, Microservices Architecture

EXPERIENCE

Software Developer **Greet Labs Pvt. Ltd., Bangalore**
August 2024 – Present
Project: Texub (Global B2B IT Marketplace)

- **Developed and optimized full-stack B2B applications** using **React.js, Redux, Node.js, and Express.js**, delivering scalable solutions, enhancing user experience, and improving application performance by **30%**.
- **Boosted backend and database performance** by optimizing **MySQL and MongoDB** queries, implementing indexing strategies, and improving data retrieval efficiency, reducing API latency by **25%**.
- **Ensured high system reliability and seamless real-time data flow** by optimizing client-server communication and resolving critical production issues through debugging and performance tuning.

PERSONAL PROJECTS

StudySync – Smart Academic Productivity & Task Management Platform *GitHub*

- Built a full-stack academic productivity and task management platform using **React.js, Node.js, Express.js, MongoDB**, and **JWT Authentication**, enabling secure study planning and task organization.
- Developed secure authentication workflows, including **email-based password reset functionality**, and built a responsive productivity platform with **study planning, schedule management, personalized settings**, and **progress tracking** using **React.js** and **Tailwind CSS**.
- Developed an intelligent task management system featuring **CRUD operations, priority-based scheduling, MongoDB persistence, overdue task detection**, and **real-time browser notifications** to improve deadline tracking and reduce manual task monitoring effort by **30%**.

AzureBay Suite – Scalable Resort Booking & Management Platform *GitHub*

- Architected and developed a scalable full-stack resort booking platform using **Node.js, Express.js**, and **MongoDB**, designing modular **REST APIs** and optimized data models for high-performance operations.
- Engineered a secure backend system with **JWT authentication, RBAC, Helmet, CORS**, and **rate limiting**, reducing unauthorized access risks by **60%** and ensuring secure, stateless API interactions.
- Built a **responsive and production-ready frontend & admin dashboard** using React and Redux Toolkit, integrating real-time analytics, efficient state management, and seamless client-server communication.

EDUCATION

Sahyadri College of Engineering & Management, Mangalore *2021-25*
Computer Science & Engineering CGPA: 9.26/10

ACHIEVEMENTS / CERTIFICATIONS

- **Full Stack Development Certification-TCE** *Sep 2023*
- **Database and SQL Certification-Infosys** *Mar 2024*
